## SOLVENT-BASED LIQUID LAMINATES FOR DYE-BASE INKS AND WATER-SENSITIVE INK / MEDIA COMBINATIONS

**ClearJet®** is an inexpensive way to protect your prints, fine art, signs, banners, photographic output, awnings and other products. It is an easy to apply clear coating and does not require extensive equipment.

- Use instead of film laminates
- Contains state-of-the-art UV inhibitors and light stabilizers
- High performance – Excellent exterior durability
- Enhances color
- Highly flexible
- Provides resistance against chemicals and water
- Protects from abrasion and marring
- Will not yellow
- Use on digital output: piezo, electrostatic, thermal, pigmented ink and dye-based inks
- Excellent for **water-sensitive inks** and Media
- Excellent on vehicle and fleet graphics
- **We offer formulations for specific application methods**
  - No clean-up aerosol spray cans
  - Type BR Brush & Roll formula
  - Type S Ready-to-Spray formula
- **Available in 2 Series**
  - ClearJet Original
  - ClearJet Fine Art
- **Available in Different Finishes**
  - ClearJet Original - Gloss and Semi-gloss
  - ClearJet Fine Art - Gloss, Semi-gloss and Low Gloss

Use **ClearJet** on most substrates, including canvas, vinyl (enamel receptive and non-enamel receptive), banners, fiberglass, wood, metal, plastic, and paper.

FA (Fine Art) series is made to penetrate the canvas, making the ink/media combination more flexible. It does not cause discoloration or color shifts and does not react with the ink jet receptive layer of most fine art canvas.
