

## CLEARSHIELD® Type C

**ClearShield®** Type C is the ideal coating for Giclee canvas applications. Type C exhibits the flexibility required for stretching canvas with no cracking of the clear coat. It is formulated to work on micro porous and porous ink jet receptive layers. Type C reduces or eliminates pinholes normally encountered when applying Liquid Laminates to ink jet coated canvas. Type C is formulated for water resistant canvas only and is used with pigmented inks. ClearShield Type C can be applied with most application techniques including automated equipment.

## PROPERTIES

- Use instead of film laminates
- Water-based
- Low odor
- Contains state-of-the-art UV inhibitors and light stabilizers
- High performance – Excellent exterior durability
- Enhances color
- Highly flexible
- Protects from abrasion and marring
- Chemical Resistant
- Water Resistant
- Will not yellow
- Use on digital output: solvent based ink, Pigmented ink (non-water-sensitive)
- Apply with Roller, Spray or Automated Equipment
- Easy clean-up with soap and water
- Available in 3 finishes: Gloss, Semi-Gloss and 30<sup>0</sup> Satin
- Packaging: quarts, gallons, five-gallon pails

Note: For gel coated and other water sensitive canvas and dye based inks please use our ClearJet Fine Art Product line.
