## PRODUCT DIRECTORY

**CLEARSHIELD®** Our **water based Liquid Laminate** is a highly flexible, ultraviolet protective clear coating. You can use ClearShield on most solvent based and pigmented digital inks printed on water resistant substrates. ClearShield provides enhanced exterior durability with increased chemical moisture and abrasion resistance. It contains ultraviolet stabilizers for maximum protection. You can use ClearShield on vinyl, plastics, and conventional rigid substrates such as wood, metal, and fiberglass. You can apply ClearShield with a foam brush, roller, or spray. ClearShield is available in gloss, semi-gloss, 20° satin, and matte finishes in quarts, gallons, 5 gallon pails, and drums

- Original** Our most versatile product for use over most output including eco-solvent inks
- Type LL** For use in automated laminating equipment and mop applications
- Type C** For use on water-resistant canvas and many micro-porous ink jet receptive substrates
- Type VG** Offers extra flexibility for molding over rivets and extra chemical resistance. \*\*Not recommended for use with Eco-Sol inks.
- Anti-Graffiti** Our new two-component, water-based anti-graffiti clear can be cleaned easily with our non-petrochemical citrus based cleaner or other commercial solvents. \*\*Not recommended for use with Eco-Sol inks.
- Production Clear** Developed for the growing UV curable market. Production Clear shows great adhesion to hard-to-coat substrates. It also shows great resistance to marring as well as the ability to conceal some of the "railroad tracks" that are often associated with UV printing.

**CLEARJET®** Our **solvent based Liquid Laminate** is a highly flexible, ultraviolet protective clear coating. You can use ClearJet over most pigment and dye based inks on water-sensitive media. It provides enhanced durability, chemical, water, mar and abrasion resistance on a variety of media. ClearJet contains ultraviolet light stabilizers for maximum protection and it will not yellow. ClearJet is available in gloss and semi-gloss finishes

- Type A2000** A no-clean up, 12 net oz. aerosol can
- Type BR** For brush and roll application in quarts and gallons
- Type S** A ready-to-spray formula, in gallons
- Series FA Fine Art** For water-sensitive canvas and fine art paper. It is available for all application techniques including aerosol.

**JETSTAR® SUPER-WIDE FORMAT DIGITAL INKS** – Our durable ink system is for large and grand format printing. These non-clogging inks have the brightest, most permanent colors. Low square-foot cost. They are easy to calibrate and easy to changeover from other ink systems. We provide full technical support. We currently support most Xaar 126, 128 and Spectra print head platform printers, including \*Nur™ Salsa, Fresco and BlueBoard; HP Gran Jet and XL Jet; Vutek™;; Gandinnovations™ Jetti; DGI™ and Infinity™ printers.

**MARAJET WIDE FORMAT DIGITAL INKS** – Our mild-solvent wide format ink system offers excellent light fastness, high color density and brilliant shades with a wide color gamut. Mimaki™ JV3, Roland™ Versacam and SolJet can be converted easily to our bulk systems. We offer full technical support and color profiling both in the field and through our interactive website.

**UV CURED DIGITAL INKS** – Our fast drying UV curable inks offer excellent adhesion to a vast number of substrates, they provide great color shades and chemical resistance. We currently support Zund™ UV Jet 215C and Jet Plus as well as the Inca™ Eagle 44.

\* Trademarks are owned by the respective printer manufacturers.

**WINDOW JUICE** – The first vinyl application fluid specifically designed for applying vinyl letters, decals and graphics to glass and windows. It is fast, safe, simple, and easy to apply. Works in extreme weather conditions: hot and cold, dry and humid. Available in quarts and 4 oz. bottles

**GRAFIX GONE** – This is a less aggressive adhesive remover, non-corrosive and good smelling. It is a mild, solvent based product that makes the removal of any vinyl adhesive residue fast and easy. It requires no extra cleanup and will not burn most plastics. It also removes old paper sheeting from plastic. Available in quart and 4 oz. bottles

**ACTION TAC** – This is our ready-to-use application fluid for all grades of vinyl. It is less aggressive and more efficient than other products resulting in stable, fast vinyl transfers. It is also an excellent cleaner and prep agent. It will not attack transfer tape or cause separation. It has a pleasant vanilla scent. Supplied in gallon, quart, and 4 oz. bottles

**CITRUS BASED GRAFFITI REMOVER** - Our Graffiti remover is a plant derived cleaning solution without the health and safety issues associated with other solvents. Our biodegradable, environmentally friendly graffiti remover will also work as a cleaner, degreaser, and adhesive remover. It meets the toughest health, safety and environmental regulations. Contains no hazardous air pollutants and contains no global warming compounds. It is the ideal graffiti remover or adhesive remover.

**SPLASH** – This is our unique concentrated vinyl application fluid. An 8 oz. bottle dilutes with water to make one gallon of application fluid. Splash is formulated to make applying vinyl lettering, decals and graphics quicker and easier. It is safe to use on all grades of vinyl. It helps eliminate bubbles and wrinkles during application while promoting faster adhesion. Splash can also be used as a prep agent.

**StarLam 1600 R** - applies a smooth consistent coating of our water-based ClearShield® liquid laminate. Handling a wide variety of substrates up to 64" wide, the StarLam makes liquid lamination quick and easy. Our innovative and proven system offers increased profitability by providing a cost effective, simple laminating solution.

Use StarLam for:

- Vehicle Graphics
- Banners
- POP and Trade Show Displays
- Wall Paper
